

FIRST RESPONDER MENTAL HEALTH SUMMIT

CLINICIAN AWARENESS COURSE

Learn directly from first responders and their experiences while connecting with like-minded mental health professionals.

Join us for a unique day long training opportunity:

- Hear first-hand about perspectives and experiences of local first responders (firefighters, police, 911 dispatch & EMS)
- Understand cultural aspects of first responders including lingo and lifestyle
- Better grasp the mental health struggles within this community, including barriers to care and how to build trust
- Participate in experiential activities and simulated emergency situations led by first responders themselves to get a practical understanding of some of the demands of their work

It won't be just another boring power point presentation!

Professionals from multiple disciplines encouraged to attend including LADC, LPCC, LMFT, LICSW, LP.

**Please note: All visitors to the Blue Cross campus will be required to attest that they have been vaccinated against COVID-19.*
